ECOLAB - iodine solution
Ecolab Inc.

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, click here.

FOR COMMERCIAL USE ONLY
KEEP OUT OF REACH OF CHILDREN

CAUTION
Not for internal use. May cause eye irritation. If swallowed, may cause irritation, nausea, stomach distress.

PRECAUTIONARY STATEMENTS
No protective equipment is necessary under normal use conditions. If splashing may occur, eye protection is
recommended.
Consult your Ecolab Representative for specific use instructions and recommended dispensing equipment.

FIRST AID
If in Eyes: Immediately flush eyes with plenty of cool, running water. Remove contact lenses; then continue
flushing for at least 15 minutes, holding eyelids apart.
If Swallowed: Rinse mouth; then immediately drink 1 or 2 large glasses of water. DO NOT induce vomiting.
Never give anything by mouth to an unconscious person.
IF IRRITATION OR DISCOMFORT PERSISTS, CALL A PHYSICIAN.
FOR EMERGENCY MEDICAL INFORMATION IN USA OR CANADA, CALL: 1-800-328-0026.
FOR EMERGENCY MEDICAL INFORMATION WORLDWIDE, CALL: 1-651- 222-5352 (IN THE USA).

DIRECTIONS FOR USE
IMPORTANT: Do not mix *1% Iodine with 10% Emollients* with water, any other teat dips, or other products unless
specified in product use instructions. If transferred from this container to any other, make sure that the other
container is thoroughly pre-cleaned and bears the proper container labeling for *1% Iodine with 10% Emollients*.
If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or
return any unused product to the original container.
Before Milking: Wash teats thoroughly just prior to next milking with appropriate udder wash solution or premilking
teat dip or teat spray to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.
Pre-Milk Dipping: Fill teat dip cup with *1% Iodine with 10% Emollients*. Do not dilute. Before each cow is milked,
dip each teat full-length into the teat dip cup containing the product. Wipe teats dry after dipping, using singleservice
towels to avoid contamination of milk.
Post-Milk Dipping: Immediately after each milking, use *1% Iodine with 10% Emollients* at full-strength. Dip each
teat full-length into the teat dip cup containing the product. Allow to air dry. Do not wipe. Always use fresh, fullstrength

1% Iodine with 10% Emollients. Do not turn cows out in freezing weather until product is completely dry.

Expanded Usage: When freshening cows, begin dipping teats twice daily for about 10 days before calving.

PRECAUTION:*1% Iodine with 10% Emollients* is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.
