* USDA Certified Organic

Also Contains

*Lavandin Oil**, *Tea Tree Oil**, *Eucalyptus Oil**, *Palmarosa Oil**, *Rose Geranium Oil**, *Pine Oil**,
*Lemongrass Oil**

Indications

This product is intended to treat symptoms of oral herpes simplex 1 or 2 after diagnosis by a physician. Herpes is a viral infection with symptoms of rashes or blisters, redness and pain.

Directions

Shake well before use. Apply 2-3 drops on a moistened swap and dab to problem area 3-4 times per day during an outbreak. For best result: Immediately and often at the very first signs of an outbreak or when you feel one coming on. Use of this product during prodrome (tingling some experience before an outbreak) may improve results. Apply to the soles of feet 3 times per day for systemic support. Wash hands after use. Avoid contact with eyes. For children under 2 years of age, consult a doctor before use.

Warnings

Viral infections are contagious, and this product will not prevent the spread of the virus that causes herpes or any other virus. Some individuals may be sensitive to essential oils. Begin with a small drop to determine if the product causes any increased redness or irritation and discontinue use if it irritates your skin. **For external use only.** If accidental ingestion of more than several drops, and adverse reaction occurs, get medical help or contact a Poison Control Center. Do not apply to the eyes. If you are pregnant or breast-feeding, ask a health professional before use. Not for use on children under the age of 2 without physician direction.

Keep all medicines out of the reach of children.

Stop use and consult a doctor if condition worsens, or consult a doctor if symptoms show no improvement after 7 days.

Tips For Use

H-Balm Control Extra Strength typically provides healing results in as little as 1-3 days. The healing time can be made longer or shorter depending on a few factors including:

- The strength of the individuals' immune system – the healthier the immune system the quicker your healing time will be.
- Your application schedule - H-Balm Control Extra Strength should be applied at least 3-4 times every day while the symptom exists.

H-Balm Control Extra Strength is a highly concentrated formula and only 1-2 drops per application is needed for maximum therapeutic affect. Apply directly to outbreak site with cotton swab or clean finger.

The first sign that the H-Balm Control Extra Strength is working is a slight tingling or cooling sensation at the site of the outbreak. Typically, the outbreak will begin to shrink within 1-2 days and it will continue to do so until completely healed.

***Note:** If you do not see results within 5 days, we recommend upgrading to H-Balm Control Extreme Strength.*
