Active ingredients

Fluoride as sodium fluoride.

Other Ingredients

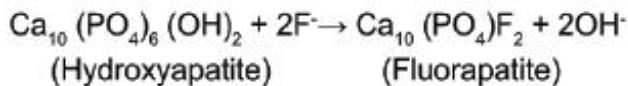

Xylitol, microcrystalline cellulose, mannitol, talc, magnesium stearate, sucralose, natural flavors, citric acid.

CLINICAL PHARMACOLOGY

It is well established that fluoridation of the water supply (1 ppm fluoride) during the period of tooth development leads to a significant decrease in the incidence of dental caries.

Multivitamin with Fluoride Chewable Tablets provide sodium fluoride and ten essential vitamins in a chewable tablet. Because the tablets are chewable, they provide a topical as well as systemic source of fluoride.

Hydroxyapatite is the principal crystal for all calcified tissue in the human body. The fluoride ion reacts with the hydroxyapatite in the tooth as it forms to produce the more caries-resistant crystal, fluorapatite. The reaction may be expressed by the equation:

Three stages of fluoride deposition in tooth enamel can be distinguished:

1. Small amounts (reflecting the low levels of fluoride in tissue fluids) are incorporated into the enamel crystals while they are being formed.
2. After enamel has been laid down, fluoride deposition continues in the surface enamel. Diffusion of fluoride from the surface inward is apparently restricted.
3. After eruption, the surface enamel acquires fluoride from the water, food, supplementary fluoride and smaller amounts from saliva.

INDICATIONS AND USAGE

Supplementation of the diet with fluoride and ten essential vitamins.

Multivitamin with 1.0 mg Fluoride Chewable Tablets provide fluoride in tablet form for children 6-16 years of age in areas where the water fluoride level is less than 0.3 ppm.

Multivitamin with 0.5 mg Fluoride Chewable Tablets provide fluoride in tablet form for children 4-6 years of age where the water fluoride level is less than 0.3 ppm, and for children 6 years of age and above where the drinking water contains 0.3 through 0.6 ppm of fluoride.

Multivitamin with 0.25 mg Fluoride Chewable Tablets provide fluoride in tablet form for children 4-6 years of age where the drinking water contains 0.3 through 0.6 ppm of fluoride.

Multivitamin with Fluoride Chewable Tablets supply significant amounts of vitamins A, C, D, E, thiamin, riboflavin, niacin, vitamin B6, vitamin B12, and folate to supplement the diet, and to help assure that nutritional deficiencies of these vitamins will not develop.

The American Academy of Pediatrics recommends that children up to age 16, in areas where drinking water contains less than optimal levels of fluoride, receive daily fluoride supplementation.

Children using Multivitamin with Fluoride Chewable Tablets regularly should receive semiannual dental examinations. The regular brushing of teeth and attention to good oral hygiene practices are also essential.

WARNING

Keep this and all medication out of the reach of children. In case of accidental overdose, seek professional assistance or contact a poison control center immediately.

Should be chewed. This product, as with all chewable tablets, is not recommended for children under age 4 due to risk of choking.

PRECAUTIONS

The suggested dose of Multivitamin with Fluoride Chewable Tablets should not be exceeded, since dental fluorosis may result from continued ingestion of large amounts of fluoride.

Before prescribing Multivitamin with Fluoride Chewable Tablets:

1. Determine the fluoride content of the drinking water from all major sources.
2. Make sure the child is not receiving significant amounts of fluoride from other sources such as medications and swallowed toothpaste.
3. Periodically check to make sure that the child does not develop significant dental fluorosis.

ADVERSE REACTIONS

Allergic rash and other idiosyncrasies have been rarely reported.

DOSAGE AND ADMINISTRATION

One tablet daily or as prescribed.

HOW SUPPLIED

Multivitamin with 1.0 mg, 0.5 mg and 0.25 mg Fluoride Chewable Tablets are all available in 30 and 90 tablet bottles.

STORAGE

Store in a cool dry place. Protect from light and moisture.

Multivitamin Chewable Tablets with Fluoride

No dyes, artificial flavors or sugar

Each Chewable Tablet contains:

Vitamin A	2500 IU
Vitamin C	60 mg
Vitamin D	40 IU
Vitamin E	15 IU
Thiamine	1.05 mg
Riboflavin	1.2 mg
Niacin	13.5 mg
Vitamin B6	1.05 mg
Folate	0.3 mg
Vitamin B12	4.5 mg
Fluoride	1.0 mg

Description: Off-white to pale yellow, speckled, orange flavored, hexagon shaped chewable tablet. Debossed "SCI" on one side and "#003" on the other. **Active Ingredient:** Fluoride Sodium Fluoride (NaF) 12.2 mg. **Inactive Ingredients:** Xylitol, microcrystalline cellulose, malic acid, citric acid, talc, magnesium stearate, natural orange flavor, sucrose.

Dosage and Administration: One tablet daily. Dissolve in mouth or chew before swallowing, preferably at bedtime after brushing teeth. Overdosage: Prolonged daily ingestion of excessive fluoride will result in varying degrees of fluorosis. **Caution:** Do not eat or drink dairy products within one hour of fluoride administration. **WARNING: KEEP THIS AND ALL MEDICATIONS OUT OF REACH OF CHILDREN. IN CASE OF ACCIDENTAL OVERDOSE, SEEK PROFESSIONAL ASSISTANCE OR CONTACT A POISON CONTROL CENTER IMMEDIATELY.** This product is not recommended for children under age 4. **Adverse Reaction:** Allergic rash and other idiosyncrasies have been rarely reported. **Storage:** Store in a cool, dry place at a controlled room temperature 20° - 25°C (68° - 77°F). Excursions permitted to 15° - 30°C (59° - 86°F). Store in original container. Dispense in a tight, light-resistant container with a child-resistant closure as defined in the USP/NF. All prescription substitutions using this product shall be pursuant to state statutes as applicable.
