do not bandage tightly or cover treated area

do not use with a heating pad

do not get into eyes or on mucous membranes

a transient burning sensation may occur upon application but generally disappears in several days

if severe burning sensation occurs, discontinue use immediately and read inside of carton for important information

do not expose the area treated with product to heat or direct sunlight

Stop use and ask a doctor if

condition gets worse

redness is present

irritation develops

symptoms last for more than 7 days or clear up and occur again within a few days

If pregnant or breast-feeding

ask a health professional before use.

Keep out of reach of children

. If swallowed, get medical help or contact a Poison Control Center right away.

Directions

apply to affected area

place applicator on skin, press firmly and hold to activate the dispensing of liquid

massage into painful area until thoroughly absorbed

repeat as necessary, but no more than 3 to 4 times daily

if medicine comes in contact with hands, wash with soap and water

storage

Store between 20 °C and 25 °C (68 °F and 77 °F). Close cap tightly after use.

PLEASE READ AND KEEP THESE DIRECTIONS

What is capsaicin? Capsaicin, a naturally occurring substance derived from hot peppers, is a safe and effective topical analgesic for arthritis pain.

What does capsaicin do? When applied to the affected area, capsaicin penetrates deep and specifically targets pain transmitting neurons by progressively deteriorating their ability to signal pain to the brain, effectively relieving minor aches and pains of muscles and joints associated with arthritis, simple backache, strains, sprains and bruises.

When used every day, as directed, the effectiveness of capsaicin continues to build more and more. The amount of time required for pain relief to occur varies with each person. Some arthritis sufferers may obtain relief within the first week of use, while others may experience relief later. This product can be used for all types of arthritis.

Are there any side effects? Due to the nature of capsaicin, a mild tolerable burning and/or itching sensation may be experienced when the product is applied which may last up to 48 hours. This mild burning and/or itching sensation typically diminishes with continued use, and is not a reason to discontinue using this product.

Severe discomfort has been reported in some individuals. If severe burning and/or itching occurs, discontinue use immediately and remove excess product by thoroughly washing with soap and cold water. If regular soap and water does not completely wash away the residue, try using dishwashing liquid or cooking oil at room temperature. This discomfort can be expected to subside completely. If you experience blistering, or significant improvement does not occur, stop use and contact your doctor.

Warm or hot water, direct sunlight or exposure to heat may increase the likelihood of burning and itching. Therefore, do not apply immediately before or after activities such as bathing, swimming, using a hot tub, sunbathing or exposure to heat.

- If you are a first time user and think your skin might be sensitive to capsaicin, test it on a small area first.
- Children 18 years of age or younger: consult a doctor before using.

- Wear gloves to apply or, if medicine comes in contact with hands, wash with soap and water after applying to avoid spreading to the eyes or other sensitive areas of the body. Try using dishwashing liquid or cooking oil at room temperature if regular soap and water does not completely wash the product from your hands. If product gets into the eyes, wash with water.
- Apply to affected area and using the applicator, press firmly on skin and hold to activate the dispensing of liquid. Massage into painful area until thoroughly absorbed.
- If you are using capsaicin on your hands, allow 30 minutes for it to penetrate before washing. During this time avoid touching damaged or irritated skin and avoid contact with the eyes and mucous membranes. After 30 minutes, wash hands with soap and water.
- If you wear contact lenses, avoid touching them after applying this product. Handle lenses before use.

Important: keep this carton as it has complete information.
