Patient Information

When was Canova Immune Support developed?

In the 1960s, Dr. Francisco Canova, an Argentinean medical doctor and trained homeopath, developed a homeopathic medicine, later called Canova Immune Support, for the debilitating effects of a compromised immune system. Canova Immune Support developed a loyal following reaching over 10,000 users by the early 1990s.

What is Canova Immune Support?

Canova Immune Support is a homeopathic medicine made from 17 different plants, mineral and animal ingredients. It provides favorable support to your immune system in your day-to-day activities by boosting the body's immune system and enhancing resistance to immune challenges due to fatigue, exposure to environmental challenges, and stress. Canova Immune Support is a complement, not replacement, to traditional (allopathic) medicine.

Can Canova Immune Support be used to treat recurring illnesses?

For patients with recurring illnesses, Canova Immune Support aims to reduce the intensity and frequency of episodes or outbreaks, as with allergies or herpes, for example.*

What is the main benefit of taking Canova Immune Support?

Canova Immune Support stimulates the human body's defenses against infection, disease, or other unwanted biological invasion, providing relief for symptoms experienced by people with a weakened

immune system, such as fatigue, nausea, appetite loss, and aches and pains. The ultimate and main benefit of Canova Immune Support is the improved quality of life for people fighting incapacitating symptoms, such as the severity of those associated with the flu.*

Can Canova Immune Support be taken in conjunction with other medications?

The extremely small doses of each active homeopathic ingredient of Canova Immune Support assure it is safe and has no known side effects or contraindications. Canova Immune Support can be safely taken with other conventional medicines and is usually recommended as a complement to other treatments.*

Can I give Canova Immune Support to my children?

Homeopathic medicines are generally safe for children. Please see package labeling for specific drug facts and dosage recommendations. For a child under the age specified on the label, please check with a doctor or pharmacist first.

Can I use Canova Immune Support by myself, without a doctor's supervision?

Canova Immune Support may be used for self-diagnosable conditions that do not require a doctor's supervision. Canova Immune Support is clearly labeled with warnings and directions for use, as per FDA Regulations. Always read and follow label directions when taking Canova without a doctor's supervision.

Is Canova Immune Support safe to use when pregnant?

As with any medicine, pregnant women should seek the advice of a medical professional before use.

How popular is Canova Immune Support?

Canova Immune Support is currently used by an estimated 30,000 people worldwide.

Has Canova Immune Support been researched?

Several Universities and Research Institutions conducted various research studies on Canova Immune Support and published their results in 16 international life science journals, seven university published papers, and 19 international congress papers.

What is the best way to store Canova Immune Support?

The best way to store Canova Immune Support is away from direct sunlight, TV sets, radios, microwave ovens, cell phones, other electrical appliances and fragrant substances, such as perfumes. It is also important that the bottle be tightly closed after each use.

*This statement has not been approved by the FDA. This product is not intended to treat, cure or prevent any disease.
