Scott's SELECT NEPHRO-STAT HEMOSTATIC SOLUTION

NDC# 69638-059-20

25% Aluminum Chloride

30cc

INSTRUCTIONS FOR USE

Drug Facts

<u>Active Ingredient</u>	<u>Purpose</u>
25% Aluminum Chloride	Astringent

USES

Nephro-Stat is a topical astringent solution of Aluminum Chloride. Gingival retraction can be achieved using a plain gingival retraction cord moistened with Nephro-Stat. Stops gingival bleeding fast. If you should inadvertently damage the gingival margin during tooth preparation or while placing a strip, a band or a cervical matrix, moisten the area with Nephro-Stat which will control and stop bleeding quickly.

Nephro-Stat contains no epinephrine. The use of vasoconstrictors for gingival retractions and bleeding is potentially dangerous and should be avoided.

A plain gingival retraction cord can be dipped in Nephro-Stat solution and then placed into the gingival sulcus for its hemostatic action.

WARNINGS

- Discontinue use if irritation appears.
For topical application only.
- Avoid eye contact.
- Do not use in patients with a known history of hypersensitivity to aluminum chloride.
- For professional use only.
- Federal law restricts the product to sale or use on the order of a dentist.

DIRECTIONS FOR USE

- Soak a cotton tipped applicator with Nephro-Stat.
- Apply to bleeding area with pressure until bleeding is stopped. Should a small dark coagulation appear, flush it away with water.
This will have no effect on hemostatic action.
- Remove the impregnated cord from sulcus.
- Flush with water and air dry until bleeding is no longer present.

OTHER INFORMATION

Store at 59° – 86°F (15° – 30°C).

Protect from freezing.

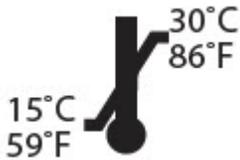

INACTIVE INGREDIENTS

Benzyl Alcohol, Distilled Water, Potassium Chloride, Propylene Glycol
