**Prescribing Information**

**Each Fluoride Chewable Tablet Contains:**

**Supplement Facts**

Dosage Size 1 Chewable Tablet

	<b>Amount per Tablet</b>	<b>% DV Adults and Children 4 years or More</b>
Vitamin A (as Vitamin A acetate)	2500 IU	50%
Vitamin C (as ascorbic acid)	60 mg	100%
Vitamin D (as cholecalciferol)	400 IU	100%
Vitamin E (dl-alpha tocopherol acetate)	15 IU	50%
Thiamine (as thiamine)	1.05 mg	70%
Riboflavin (as riboflavin)	1.2 mg	71%
Niacin (as niacinamide)	13.5 mg	68%
Vitamin B6 (as pyridoxine HCl)	1.05 mg	53%
Folate (as folic acid)	300 mcg	75%
Vitamin B12 (as cyanocobalamin)	4.5 mcg	75%
Fluoride (as sodium fluoride)	1.0 mg	*

\*Daily value (DV) not established

**Multivitamin with Fluoride 1.0 mg Chewable Tablets** active ingredient for  
**caries prophylaxis:** Fluoride as sodium fluoride

**Multivitamin with Fluoride 1.0 mg Chewable Tablets** provide sodium fluoride and ten essential vitamins in a chewable tablet.

**Other ingredients:** citric acid, magnesium stearate, mannitol, microcrystalline cellulose, orange flavor, sucralose, talc, xylitol.

## CLINICAL PHARMACOLOGY

It is well established that fluoridation of the water supply (1 ppm fluoride) during the period of tooth development leads to a significant decrease in the incidence of dental caries.

**Multivitamin with Fluoride 1.0 mg Chewable Tablets** provide sodium fluoride and ten essential vitamins in a chewable tablet. Because the tablets are chewable, they provide a *topical* as well as *systemic* source of fluoride. *Hydroxyapatite* is the principal crystal for all calcified tissue in the human body. The fluoride ion reacts with the hydroxyapatite in the tooth as it is formed to produce the more caries-resistant crystal, *fluorapatite*. The reaction may be expressed by the equation:

(Hydroxyapatite) (Fluorapatite)

Three stages of fluoride deposition in tooth enamel can be distinguished:

1. Small amounts (reflecting the low levels of fluoride in tissue fluids) are incorporated into the enamel crystals while they are being formed.
2. After enamel has been laid down, fluoride deposition continues in the surface enamel. Diffusion of fluoride from the surface inward is apparently restricted.
3. After eruption, the surface enamel acquires fluoride from the water, food, supplementary fluoride and smaller amounts from saliva.

## INDICATIONS AND USAGE

Supplementation of the diet with ten essential vitamins.

Supplementation of the diet with fluoride for caries prophylaxis.

**Multivitamin with Fluoride 1.0 mg Chewable Tablets** provide 1.0 mg fluoride in tablet form for children 6-16 years of age in areas where the water fluoride level is less than 0.3 ppm.

**Multivitamin with Fluoride 1.0 mg Chewable Tablets** supply significant amounts of Vitamins A, C, D, E, thiamine, riboflavin, niacin, vitamin B6, vitamin B12, and folate to supplement the diet, and to help assure that nutritional deficiencies of these vitamins will not develop.

Thus, in a single easy-to-use preparation, children obtain ten essential vitamins and the important mineral, fluoride. The American Academy of Pediatrics recommends that children up to age 16, in areas where drinking water contains less than optimal levels of fluoride, receive daily fluoride supplements.

Children using **Multivitamin with Fluoride 1.0 mg Chewable Tablets** regularly

should receive semiannual dental examinations. The regular brushing of teeth and attention to good oral hygiene practices are also essential. Multivitamin with Fluoride Chewable Tablets is a prescription product for the clinical dietary management of the metabolic processes of caries prophylaxis and provides supplementation of the diet with ten essential vitamins.

## **WARNING**

**Keep out of the reach of children. In case of accidental overdose, seek professional assistance or contact a Poison Control Center immediately.**

## **CAUTION**

Do not eat or drink dairy products within one hour of fluoride administration.

Should be chewed. This product, as all chewable tablets, is not recommended for children under age 4 due to risk of choking.

## **PRECAUTION**

The suggested dose of **Multivitamin with Fluoride 1.0 mg Chewable Tablets** should not be exceeded, since dental fluorosis may result from continued ingestion of large amounts of fluoride.

Before prescribing **Multivitamin with Fluoride 1.0 mg**

### **Chewable Tablets:**

1. Determine the fluoride content of the drinking water from all major sources.
2. Make sure the child is not receiving significant amounts of fluoride from other sources such as medications and swallowed toothpaste.
3. Periodically check to make sure that the child does not develop significant dental fluorosis.

## **ADVERSE REACTIONS**

Allergic rash and other idiosyncrasies have been rarely reported.

## **DOSAGE AND ADMINISTRATION**

One tablet daily, to be dissolved in the mouth or chewed before swallowing. Do not give a chewable tablet to a child younger than 4 years old.

## **HOW SUPPLIED**

NDC: 63629-1138-1: 100 Chewable Tablets in a BOTTLE

Repackaged/Relabeled by:  
Bryant Ranch Prepack, Inc.  
Burbank, CA 91504

## STORAGE

Store at 20°-25°C (68°-77°F); excursions permitted to 15°-30°C (59°-86°F). See USP Controlled Room Temperature.

Dispense in a tight, light resistant container with a child-resistant closure as defined in the USP/NF. All prescription substitutions using this product shall be pursuant to state statutes as applicable. This is not an Orange Book product.

Manufactured For:  
Method Pharmaceuticals  
Fort Worth, TX 76118  
Rev. 06/2019

## Multivitamin/Fluoride Oral Tab Chew #100

GTIN  
Lot  
Exp  
SN

Each tablet contains: Vitamin A 2500 IU/  
1375 mcg; Vitamin C 60 mg; Vitamin D 400  
IU/ 10 mcg; Vitamin E 15 IU/ 10 mg; Vitamin  
B1, 1.05 mg; Vitamin B2, 1.2 mg; Niacin  
13.5 mg; Vitamin B6, 1.05 mg; Vitamin B9,  
300 ug; Vitamin B12, 4.5 ug; Fluoride  
1.0mg

Keep this and all medication out of the  
reach of children.

Store at 20° to 25°C (68° to 77°F) [See USP  
Controlled Room Temperature].

Dispense in a tight, light-resistant  
container as defined in the USP with a  
child-resistant closure.
