Dry Socket Paste  
DIRECTIONS FOR USE  
REF 10404 – Dry Socket Paste – 1oz/28g  
NPN Number: 02038641  
For dental use only.

1. DESCRIPTION  
Dry Socket Paste is formulated to relieve the symptoms of alveolar osteitis ("dry socket syndrome"). Dry Socket Paste contains 4% guaiacol and 4% eugenol in a petrolatum base.

2. INDICATIONS  
Indicated for the relief of symptoms associated with post-extraction alveolar osteitis ("dry socket syndrome").

3. CONTRAINDICATIONS  
This product should not be used with individuals with known sensitivities to guaiacol or eugenol. This product should not be used with individuals who are pregnant or suspected to be pregnant without a prior physician consultation.

4. PRECAUTIONS  
For professional dental use only. Use only as directed. Not for unsupervised home use.

5. WARNINGS  
Do not swallow. Keep out of reach of children. For professional dental use only.

6. DOSAGE AND ADMINISTRATION  
1. Establish a diagnosis of alveolar osteitis; typically characterized as a constant dull or throbbing ache, exacerbated by touch, approximately 2 days post extraction. The socket will have no clot present and will usually be packed with food debris.  
2. Thoroughly rinse and de-bride the socket.  
3. Introduce Dry Socket Paste into the socket using a flat-bladed instrument or a disposable syringe.  
4. Tamp down the Dry Socket Paste, ensuring coverage of all exposed bone.  
5. Do not cover the Dry Socket Paste.  
6. Dry Socket Paste will remain in the extraction socket 3 to 5 days and will gradually wash out as the socket heals – there is no need for a separate visit to remove the product.

7. STORAGE
Store between 59°-86°F (15°-30°C). Protect from freezing.
