POULTRY SULFA- sodium sulfamethazine sodium sulfamerazine sodium sulfaquinoxaline powder, for solution
Huvepharma

---------

Poultry Sulfa

Front Panel
PoultrySulfa®
(sulfamerazine, sulfamethazine and sulfaquinoxaline)
Antimicrobial
For Oral Veterinary Use Only
CAUTION: Federal (USA) las restricts this drug to use by or on the order of a licensed veterinarian.

For Use in Drinking Water Only
As an aid in the control of
coccidiosis and acute fowl cholera
in chickens and acute fowl cholera
and coccidiosis in turkeys, when
caused by pathogens susceptible to
sulfamerazine, sulfamethazine and
sulfaquinoxaline.

SOLUBLE POWDER
For Use in Chickens and Turkeys
THIS PACKET CONTAINS:
78 grams Sodium Sulfamerazine Activity
78 grams Sodium Sulfamethazine Activity
39 grams Sodium Sulfaquinoxaline Activity
CAUTION: Not for use in humans. Keep
out of reach of children. Federal law
prohibits the extralabel use of this product
in lactating dairy cattle.

Store between 20°C - 25°C
(68°F - 77°F) with excursions
permitted between
15°C - 40°C (59°F - 104°F).

Restricted Drug (California) - Use only as directed.

NADA 100-094, Approved by FDA

Directions

Acute Fowl Cholera - TURKEYS AND CHICKENS: As an aid in the control of acute fowl cholera caused by Pasteurella multocida susceptible to sulfamerazine, sulfamethazine and sulfaquinoxaline. Provide medicated water (.04% solution) for 2-3 days. If disease recurs, repeat treatment.

Coccidiosis - TURKEYS: As an aid in the control of coccidiosis caused by Eimeria meleagrimitis and E. adenoeides susceptible to sulfamerazine, sulfamethazine and sulfaquinoxaline. Provide medicated water (.025% solution) for 2 days, then plain water for 3 days, then medicated water (.025% solution) for 2 days, then plain water for 3 days, then medicated water (.025% solution) for 2 days. Repeat if necessary. DO NOT CHANGE LITTER.

Coccidiosis - CHICKENS: As an aid in the control of coccidiosis caused by Eimeria tenella and E. necatrix susceptible to sulfamerazine, sulfamethazine and sulfaquinoxaline. Provide medicated water (.04% solution) for 2-3 days, then plain water for 3 days, then medicated water (.025% solution) for 2 days. If bloody droppings appear, repeat at .025% level for 2 more days. DO NOT CHANGE LITTER.

Warning (Human Food)

Do not treat chickens or turkeys within 14 days of slaughter for food.
Do not medicate chickens or turkeys producing eggs for human consumption

Directions for Use

Directions for Use:

PROPORTIONER SOLUTION (1 oz/gal) - TANK MIX
.04% Solution Add one pack to 1 gallon (3.8 liters) - Add one pack to 128 gallons
.025% Solution Add one pack to 1.6 gallons (6.1 liters) - Add one pack to 206 gallons

MAKE FRESH SOLUTION DAILY. If improvement is not noted in 72 hours, consult your
veterinarian. During treatment use only medicated water unless otherwise directed. For control of disease outbreaks medication should be initiated as soon as diagnosis is determined. Treated animals must actually consume enough medicated water to provide a therapeutic dose. Do not mix or administer ingalvanized containers. Dispose of any waste or unused portions properly.

**Precaution**

May cause toxic reactions unless drug is evenly mixed in water at dosages indicated and used according to label directions.
