DHT-X
HAIRLOSS SHAMPOO

DHT hair loss is one of the most horrendous things that a person would have to face. The hair fall is a very common medical condition that occurs both in women and men. DHT blockers are the basic reason why hair loss occurs in the first place. Basically, DHT is a hormone that causes such losses in a person. It is usually found within the hair follicles of the hair, prostatic gland, testes, and the adrenal glands. The main reason why DHT hair loss occurs is because of the enzyme called five-alpha reductase which changes normal testosterone into DHT. The usage of DHT is both good and bad according to the person. For this, DHT-X shampoo can be used to cure this so that this condition can be fought and slowly the situation will be solved.
