Bacillus clausii Spores Suspension

NDC 82489-109-01

SANA GUT

Oral suspension

COMPOSITION

Each 5ml of SANA GUT oral suspension contains:
Bacillus clausii spores.....2 billions
Purified Water IP.....q.s.

PHARMACOLOGICAL CLASSIFICATION

Probiotic.

PHARMACOLOGICAL ACTION

SANA GUT 5ml Mini Bottle is a suspension of Bacillus clausii spores in purified water. These spores contain anti-diarrhoeic microorganisms which are useful for treatment of intestinal bacterial flora disorders. Besides, these also modulate immune activity by increasing production of secretory immunoglobulin A. Resistance of the spores to multi-antibiotics renders its use as a conjugant during antibiotic treatment of other pathogens. Normal gut flora of intestine acts as a barrier against harmful bacteria. SANA GUT restores the balance of intestinal flora that is upset during treatment with antibiotics or chemotherapeutic products and thereby helps to correct consequent dysvitaminosis conditions.

INDICATIONS

SANA GUT is used to cure and prevent intestinal bacterial flora disorders.

CONTRA-INDICATIONS

Should not be used in individuals hypersensitive to active ingredients.

WARNINGS

Do not exceed the doses indicated without consulting your doctor. Use only for a short period of treatment.

INTERACTIONS

There are no known food or drug interactions with Bacillus clausii spores.

PREGNANCY AND LACTATION

SANA GUT may be used during pregnancy and lactation.

DOSAGE

Adult: 2 - 3 Mini Bottle a day
Children: 1 - 2 Mini Bottle a day
