Zingiber

Folic acid alone is improper therapy in the treatment of pernicious anemia and other megaloblastic anemias where Vitamin B12 is deficient. Folic acid especially in doses above 1 mg daily may obscure pernicious anemia in that hematologic remission may occur while neurological manifestations remain progressive.

Concomitant use of ginger in patients with bleeding disorders, or who are on anti-coagulant or anti-platelet therapy, may increase the risk of bleeding.

Each pink tablet contains:

Vitamin B6 (pyridoxine hydrochloride, USP) 40 mg

Folic Acid, USP 1.2 mg

Calcium (as dicalcium phosphate and tricalcium phosphate) 124.1 mg

Ginger (zingiber officinale) root powder extract 100 mg

Other ingredients: microcrystalline cellulose, maltodextrin, stearic acid, croscarmellose sodium, corn starch, magnesium stearate, silicon dioxide, talc, hypromellose, hydroxypropyl cellulose, polydextrose, titanium dioxide, medium chain triglycerides, FD&C Red #40.

One or two tablets daily, in divided doses, or as directed by a physician.

Store between 15-30°C (59-86°F). Protect from light and moisture.

Keep out of the reach of children.

DO NOT CHEW.
