-----

**Active Ingredient**

Citric Acid Monohydrate 0.7 % w/v

**Purpose**

**DEPILATORY/HAIR INHIBITOR**

**Keep Out of Reach of Children.**

Keep Out of Reach of Children.

**Indication and Usage**

DEPILATORY/HAIR INHIBITOR

**Dosage and Administration**

Step 1 Remove Hair:

The first step of the process is to remove the hair. Any method of hair removal can be used, such as shaving, waxing, etc., but as stated above, methods that remove the hair completely from the follicle are more effective.

Step 2: Apply STOPHAIR - Hair Inhibiting Spray

The second step of the process is to apply the STOPHAIR - Hair Inhibiting Spray. Lightly spray the STOPHAIR solution on the area the hair was removed from and massage in.

This process is to be repeated twice a day for five days after the hair was removed.

Step 3: Continue Applying STOPHAIR - Inhibiting Spray once a day

The third step of the process is to continue applying the STOPHAIR - Hair Inhibiting Spray once a day to the area the hair was removed from. As in Step 2, simply spray the STOPHAIR solution on the area the hair was removed from and lightly massage in.

Continue this process until the next time the hair needs to be removed. This step will vary in length of time depending on the individual.

Step 4: Repeat Steps 2 and 3

The fourth step of the process is to repeat Steps 2 and 3 until the hair permanently stops growing. As above, the number of times this step will have to be repeated depends on the hair properties of the individual.

SPRAY LIGHTLY ONTO SKIN TWICE DAILY FOR 5 DAYS.

**Inactive Ingredient**

Water, Almond Extract and Glycerine

For external use only.

## Product Label
