

**CARDIOVASCULAR KIT- cardiovascular procedure kit**  
**Centurion Medical Products**

-----  
**Cardiovascular Kit**

**DESCRIPTION**

This preparation is designed for parenteral use only after addition of drugs that require dilution or must be dissolved in an aqueous vehicle prior to injection. Bacteriostatic 0.9% sodium chloride injections, USP is a sterile, nonpyrogenic, isotonic solution of sodium chloride injection in water for injection. Each milliliter (mL) contains sodium chloride 9 mg and 0.9% benzyl alcohol added as a bacteriostatic preservative. May contain hydrochloric acid for pH adjustment. It is supplied in a multiple-dose container from which repeated withdrawals may be made to dilute or dissolve drugs for medication. The pH is 5.0 (4.5 to 7.0). Sodium Chloride, USP is chemically designated NaCl, a white, crystalline powder freely soluble in water. The semi-rigid vial is fabricated from a specially formulated polyolefin. It is a copolymer of ethylene and propylene. The safety of the plastic has been confirmed by tests in animals according to USP biological standards for plastic containers. The container requires a vapor barrier to maintain the proper drug concentration.
