T-Support Max - Complete Thyroid Support System

T-Support Max is indicated for the clinical dietary management of the individuals with Thyroid conditions.

Hyperthyroidism

Hyperthyroidism the name given to overproduction of thyroxine, causes extreme nervousness and irritability, increased heart rate and blood pressure, and weight loss. Underproduction of thyroxine, or hypothyroidism, results in dry skin, brittle nails, and a lack of energy in adults. Goiter, which is actually an enlarged thyroid, is a sign of thyroid insufficiency. In infants, hypothyroidism can be devastating, inhibiting physical development and causing irreversible mental retardation.

Hypothyroidism Hypothyroidism is a condition in which the thyroid gland fails to function adequately, resulting in reduced levels of thyroid hormone in the body. Cretinism is a type of hypothyroidism that occurs at birth and results in stunted physical growth and mental development. Severe hypothyroidism is called myxedema.
