HOW IT WORKS

Our natural Warm Sap Patch works in two ways. First, it generates infrared heating via far infrared rays and warm emissions, improving blood circulation. Secondly, it effectively absorbs toxins circulating in the body. This capability was developed from 28 years of medical research in Japan. It is based on principles used by nature to remove toxins from the body by effectively absorbing and purifying large quantities of water through their roots. Combining the results of this research with the well known principles of reflexology led to this excellent product.

HOW TO USE

Apply to arches of the feet, center of the hands, toes and fingers, since many of the main bodily organs connect at these locations. The patch may be used at any time but is usually most convenient just prior to bed. For localized treatment place the patch on any aching, sprained or sore area.

HOW OFTEN AND HOW LONG SHOULD NATURE'S KIN PATCH BE USED?

Usage will depend on your individual health status, medication usage and diet. Usually, when the cleansing process can take from 3 days to 21 days of consecutive use. As the patches become lighter, indicating toxins have been reduced, use the patch 2-3 times per week or as you feel the need.
