PRECAUTIONS/WARNING:

PRECAUTIONS

General: Folic acid, when prescribed as a single agent in doses above 0.1 mg daily, may obscure the detection of B12 deficiency (specifically, the administration of folic acid may reverse the hematological manifestations of B12 deficiency, including pernicious anemia, while not addressing the neurological manifestations). Reduced folates may be less likely than folic acid to mask vitamin B12 deficiency. Folate therapy alone is inadequate for the treatment of B12 deficiency.

STORAGE: Store at 20°-25° C (68°-77° F). Excursions permitted to 15°-30° C (59°-86° F). [See USP Controlled

Room Temperature]. Protect from light and moisture. Dispense in a tight, light-resistant container.
