**API MAKES POND CARE EASIER**

Helping pond owners maintain clean, clear water and healthy, active fish is good at API. Visit [www.apifishcare.com](http://www.apifishcare.com) for pond tips and an easy-to-use calculator to estimate the size of your pond for better, easier pond care.

**WHY USE MELAFIX?**

Quickly heals bacterial infections on Koi and goldfish

Promotes re-growth of damaged fins and tissue

Reduces risk of disease spread when introducing new fish

Made from a botanical extract

MELAFIX uses the antibacterial properties of Tea Tree (Melaleuca) to treat bacterial infections in pond fish, including ulcers, open wounds, and fin and tail rot. Healing and tissue re-growth can often be seen within 4 days of treatment. Will not harm the biological filter. Safe for snails, aquatic plants and other wildlife. MELAFIX is also recommended when adding new fish to a pond to reduce the risk of disease outbreak.

**DIRECTIONS**

Shake well. Remove carbon from pond filter and turn off UV lights and ozone-producing units, if applicable. Use the dosing cap on the bottle. Add 15 ml (1 Tbsp.) for every 150 U.S. gallons (567 L) of pond water or 1/4 cup (60 ml) for every 600 U.S. gallons (2, 270 L) of pond water.

As a preventative when introducing new fish to the pond: Dose daily for 3 days.

To treat infections or heal wounds: Dose daily for 7 days. Double the dose when treating advanced or chronic infection. Repeat treatment, if necessary.

Notes: A slight foaming may occur during the treatment. When exposed to elevated temperatures, this product may turn cloudy in the bottle. This does not affect the activity of the product.

Keep out of reach of children.

Safe for fish and pond plants, as well as surrounding wildlife and pets, when used as directed. For ornamental pond use only

Warning: this product contains a chemical known to the state of California to cause cancer or birth defects or other reproductive harm.

Contains: Melaleuca 5.0%
