

**PENTASOL- pentobarbital sodium powder**  
**Virbac AH, Inc.**

*Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, [click here](#).*

-----

**Pentasol Powder**

**DIRECTIONS FOR MIXING:** Add water slowly to between the 150 mL and 200 mL lines. After replacing cap, shake well to dissolve all the powder. Fill to the 250 mL line ONLY with more water. (DO NOT FILL ABOVE THE 250 mL LINE.)

**To avoid leaking: DO NOT** over tighten cap prior to shaking.

**Dosage and Administration:**Inject 1 mL for each 10 pounds of body weight (Minimum 1 mL). Intravenous injection is preferred. Intraperitoneal or intracardiac injections may be made when intravenous injection is impractical, as in a very small dog or cat, or in a comatose dog or cat with impaired vascular functions.

**The following is recommended when withdrawing solution:**

1. Do not inject air into the bottle prior to withdrawing solution. 2. Use no larger than 18 gauge needles for withdrawing solution. 3. Should any dripping from the injection port occur, replace cap.

**WARNING:** For animal euthanasia only. Must not be used for therapeutic purposes and must not be used in animals intended for food. If eye contact, flush with water and seek medical advice/ attention.

**Caution:**

**CAUTION:** Federal law restricts this drug to use by or on the order of a licensed veterinarian.

**POISON**

Keep out of reach of children

**ENVIRONMENTAL HAZARD:**This product is toxic to wildlife. Birds and mammals feeding on treated animals may be killed. Euthanized animals must be properly disposed of by deep burial, incineration, or other method in compliance with state and local laws, to prevent consumption of carcass material by scavenging wildlife.
