Disclaimer: Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.

Menthol 5.2mg

Cough Suppressant, Oral Anesthetic

Uses:

- Temporarily relieves cough due to minor throat and bronchial irritation associated with the common cold
- For temporary relief of occasional minor irritation, pain, sore mouth and sore throat

Sore throat warning: if sore throat is severe, persists for more than 2 days, is accompanied or followed by fever, headache, rash, nausea, or vomiting, consult a doctor promptly. These may be serious.

Stop use and ask a doctor if:

- Cough persists for more than 1 week, tends to recur, or is accompanied by fever, rash, or persisted headache. These could be signs of a serious condition
- Sore throat symptoms do not improve in 7 days
- Irritation, pain or redness persists or worsens

Ask a doctor before use if you have:

- A persistent or chronic cough such as occurs with smoking, asthma, emphysema
- A cough that is accompanied by excessive phlegm (mucus)

If pregnant or breast feeding ask a health professional before use.

Keep out of reach of children.
