Drug Label

WHEN TO USE:

When adding new fish and to treat:

Open Red Sores

Fin and Tail Rot

Open Body Wounds

Eye Cloud, Pop Eye, Body Slime and Mouth Fungus

DIRECTIONS:

Use the API Dosing Cap on Bottle:

Shake well. Remove activated carbon, if possible.

Dose:

Add 5 ml per 10 U.S. gallons (38 L) of water.

Disease or wound treatment:

Dose daily for 7 days. After 7 days, make a 25% water change. Continue treatment, if necessary.

Adding new fish:

Dose daily for 3 days.

ACTIVE INGREDIENT: Melaleuca 1.0%

See inside of label for more information.

	FUNGAL INFECTION	BACTERIAL INFECTION	OPEN WOUND
Primary Treatment	PIMAFIX	MELAFIX	MELAFIX
Secondary Treatment		PIMAFIX	

TIPS:

Use with API PIMAFIX to synergistically treat a broad range of infections. MELAFIX can be used with all API products, including medications and water conditioners. Laboratory studies proved that MELAFIX is safe for even the most delicate fish species, including tetras, discus fry and scaleless fish like clown loaches. MELAFIX can be used with all marine fish. MELAFIX has been tested and found to be safe in reef aquariums containing invertebrates, such as live corals and anemones. Treating with MELAFIX will not harm the biological filter in freshwater or saltwater aquariums. MELAFIX is harmless to live aquarium plants. We recommend turning off the protein skimmer and UV sterilizer when treating with MELAFIX.

Note: a slight harmless foaming may occur during the treatment.

Warning:

This product contains a chemical known by the State of California to cause cancer or birth defects or other reproductive harm.

Not for human consumption or for the treatment of fish intended for human consumption. Keep out of reach of children. For aquarium use only.
