

ALPHACIDE 20K- sodium chlorite solution solution

Alpha Technology USA Corp

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, [click here](#).

Alphacide 20K

ALPHACIDE 20K

For Use in the FutureCow Teatscrubber System with Alphacide Activator.

CAUTION

KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED.

AVOID CONTACT WITH SKIN OR EYES.

USE IN A WELL-VENTILATED AREA.

SEE SIDE PANEL FOR FIRST AID INSTRUCTIONS

Active Ingredients:

Sodium Chlorite.....3. .1%

Manufactured for:

Alpha Technology USA Corporation 1335 Bennett Dr., Ste 173

Longwood, FL 32750

_ 5 Gal _15 Gal _55 Gal _ 265 Gal

FIRST AID INSTRUCTIONS

If inhaled - Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

If on skin or clothing - Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes - Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lens, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed - Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Directions for Use: : **Alphacide 20K** is mixed with Alphacide Activator to produce an effective teat cleaning and preparation solution. Neither product is intended for use alone. When using Alpha

Technology's automated activation equipment, no manual mixing is required as the equipment automatically measures the teat dip and activator to provide activated concentrate .

Preparation: If you are not using the automated activation equipment, follow these steps to prepare a ready to use solution :

1. Always prepare the activated solution in a well-ventilated area .
2. To prepare 5 gallons of ready to use solution , measure out 32 fl. oz. of **Alphacide 20K** Teat Dip Concentrate .
3. To this amount add 8 fl. oz. of Alphacide Activator. Mix gently.
4. Let the solution stand for 5 minutes.
5. Dilute with 5 gallons of potable water .

Application: Apply activated **Alphacide 20K** Solution using the Alpha Teat Scrubbing System prior to milking. Allow the solution to contact the teat skin surface for as long as possible prior to the drying and stimulating phase of the preparation procedure and attachment of the milking equipment .

Storage: Make up fresh **Alphacide 20K** solutions weekly. Once mixed, the solution should be stored in a cool dark area. Avoid storage in direct sunlight. Unmixed product should be stored in the original container and used or discarded within 1 year. The recommended storage temperature is 30-100° F. In case of spill, flood with large amounts of water prior to discarding to drain

Container Disposal: Triple rinse, then offer for recycling; or puncture and dispose of in a sanitary landfill or by incineration .
