-----  
**VCF® VAGINAL CONTRACEPTIVE FILM®**

**Drug Facts**

**Active ingredient (in each film)**

Nonoxynol-9, 28%

**Purpose**

Vaginal contraceptive

**Use**

for the prevention of pregnancy

**Warnings**

- **For Vaginal Use Only**
- **Not for rectal (anal) use**

**Sexually transmitted disease (STDs) alert**

This product does **not** protect against HIV/AIDS or other STDs and may increase the risk of getting HIV from an infected partner.

**Do not use** if you or your sex partner has HIV/AIDS. If you do not know if you or your sex partner is infected, choose another form of birth control

**When using this product**

- you may get vaginal irritation (burning, itching or a rash)

**Stop use and ask a doctor if**

- you or your partner get burning, itching, a rash, or other irritation of the vagina or penis

**Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.**

**Directions**

- before using this product, read the enclosed package insert for complete directions

and information

- be sure your fingers are dry before touching the film
- insert one film and place as far into the vagina as possible against the cervix
- insert VCF® not less than 15 minutes and not more than 3 hours before intercourse
- use one film before each act of intercourse

### **Other information**

- When used correctly every time you have sex, latex condoms greatly reduce, but do not eliminate, the risk of catching or spreading HIV, the virus that causes AIDS.
- Use a latex condom without nonoxynol-9 if you or your sex partner has HIV/AIDS, multiple sex partners, or other HIV risk factors.
- VCF® is tested by independent laboratories for determination of sperm inactivating qualities, using the I.P.P.F. agreed protocol
- Store at 58° - 86°F (15°-30°C)

### **Inactive ingredients**

glycerin, polyvinyl alcohol, purified water

 Questions? 1-800-879-2393 (9-5 E.S.T.)  
**What is VCF®?**  
 VCF® is a translucent square of material containing the active ingredient Nonoxonyl-9, a widely used highly efficient spermicide. Placed high in the vagina as close as possible to the neck of the womb (cervix), it dissolves into a gel which exerts a powerful contraceptive effect against sperm. It is a potent spermicidal agent used successfully by millions of women. You won't even know it's there. It becomes undetectable by either partner. Because VCF® is small and unnoticed in use, it can be used discreetly by the woman. It does not run and will not stain. VCF® is eventually washed away with the natural body fluids. Use one VCF® film before each act of intercourse. Before using, follow instructional leaflet exactly. The best source of information on the use of contraceptives is your family physician or family planning clinic.
