

WINTERCARE- heptanoic acid solution

Ecolab Inc.

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, [click here](#).

FOR INDUSTRIAL USE ONLY

KEEP OUT OF REACH OF CHILDREN

NOT FOR HUMAN USE

WARNING

Causes serious eye irritation. Wash skin thoroughly after handling. Wear eye protection/face protection.

DIRECTIONS:

IMPORTANT: Do not mix WinterCare with water, any other teat dips, or other products unless specified in the product use instructions. If transferred from this container to any other, make sure that the other container is thoroughly pre-cleaned and bears the proper container labeling for WinterCare.

If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or return any unused product to the original container.

Before Milking: Wash teats thoroughly just prior to next milking with appropriate udder wash solution or pre-milking teat dip to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.

Pre-Milk Dipping: Fill teat dip cup with pre-milking teat dip. Do not dilute. Before each cow is milked, dip each teat full-length into the teat dip cup. Wipe teats dry after dipping using single-service towels to avoid contamination of milk.

Post-Milk Dipping: Immediately after each milking, dip each teat full-length into the teat dip cup containing the product. Allow to air dry. Do not wipe. Always use fresh, full strength WinterCare. Do not turn cows out in freezing weather until WinterCare is completely dry.

Expanded Usage: When freshening cows, begin dipping teats twice daily for about 10 days before calving.

PRECAUTION: WinterCare is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.

Consult your Ecolab representative for specific use instructions and recommended dispensing equipment.

FIRST AID

IN CASE OF EYE CONTACT: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention.

IN CASE OF SKIN CONTACT: Rinse with water.

IF SWALLOWED: Rinse mouth. Get medical attention if symptoms occur.

IF INHALED: Get medical attention if symptoms occur.

- Contiene un sistema emoliente (glicerina, lanolina y glicol propileno) 78%

PARA USO INDUSTRIAL SOLAMENTE
MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS
NO ES PARA USA HUMANO

INSTRUCCIONES:

IMPORTANTE: No mezcle WinterCare con agua, con ningún baño antiséptico para pezones, ni con ningún otro producto a menos que los mismos hayan sido especificados en las instrucciones de uso del producto. Si el producto fuese transferido desde este envase a cualquier otro, asegúrese de que ese otro envase haya sido íntegramente prelavado y que contenga el etiquetamiento del envase de WinterCare.

Si el producto del porta baño antiséptico se tornara visiblemente sucio, deseche su contenido y vuelva a reponerlo con el producto no diluido. No vuelva a utilizar el mismo producto, ni vuelva a colocar el producto sin usar dentro del envase original.

Antes de ordeñar: Lave los pezones completamente justo antes de ordeñar con una solución de lavado apropiada para ubres o baño antiséptico para pezones previo al ordeño, o rocíe el pezón para evitar la contaminación de la leche. Posteriormente, los pezones se deben secar con toallas de servicio único o descartables. Utilice el procedimiento adecuado para el lavado o el prebañado antiséptico de las ubres.

Sellado del pezón previo al ordeño: Llena la taza del sellador de pezones con sellador de pezones previo al ordeño. No lo diluya. Antes de ordeñar a cada vaca, embeba cada teta por completo en la taza del sellador de pezones. Seque los pezones después de realizar el sellado, utilizando toallas desechables para evitar la contaminación de la leche.

Sellado del pezón posterior al ordeño: Inmediatamente después de ordeñar cada vaca, bañe toda la superficie del pezón en el recipiente que contiene el producto. Deje secar al aire. No utilice paños. Siempre utilice WinterCare fresco y sin diluir. Hasta que WinterCare no se haya secado completamente, no saque las vacas al exterior en climas cálidos.

Uso Expandido: Al refrescar a las vacas, comience con un baño antiséptico de sus pezones dos veces por día por aproximadamente 10 días antes de parir.

PRECAUCIÓN: WinterCare no está diseñado para curar o ayudar con la cicatrización de los pezones agrietados o irritados.

Como cualquier otro germicida, puede provocar irritación o sensibilización en animales sensibles. En caso de irritación o agrietamiento de los pezones, haga examinar dichas afecciones y, de ser necesario, hágalas tratar con un veterinario.

Consulte con su Representante de ECOLAB para obtener instrucciones específicas sobre el uso y el equipo dispensador recomendado.

ATENCIÓN

Provoca irritación ocular grave. Lave la piel minuciosamente después del manejo. Usar equipo de protección para los ojos / la cara.

PRIMEROS AUXILIOS

EN CASO DE CONTACTO CON LOS OJOS: Enjuague inmediatamente con abundante agua, también debajo de los párpados, por lo menos durante 15 minutos. Quitar las lentes de contacto, cuando estén presentes y pueda hacerse con facilidad. Proseguir con el lavado. Consultar un médico.

EN CASO DE CONTACTO CON LA PIEL: Lave con agua.

EN CASO DE INGESTIÓN: Enjuague la boca. Consultar un médico si los síntomas aparecen.

EN CASO DE INHALACIÓN: Consultar un médico si los síntomas aparecen.

LEA LA FICHA DE DATOS DE SEGURIDAD ANTES DE USAR EL PRODUCTO
