

API MARINE STRESS COAT - aloe vera liquid
MARS FISHCARE NORTH AMERICA, INC

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, click here.

Drug Facts

BENEFITS

Contains Aloe Vera which promotes healing and regeneration of damaged fish tissue and forms a synthetic slime coat to help prevent electrolyte imbalance.

API MARINE STRESS COAT also removes chlorine, chloramines and ammonia in tap water.

Developed for use with a protein skimmer; will not cause foaming.

WHEN TO USE

When using tap water to set up a marine aquarium, when adding or handling fish, changing water or when fish are damaged by injury or disease.

DIRECTIONS

Use dosing cap on bottle.

To help repair damaged skin and fins and to replace slime coating: Add 10 ml per 10 u.s. (38 L) of aquarium water.

To remove chlorine, chloramines and ammonia: Add 5 ml per 10 U.S. gallons (38 L) of aquarium water.

TIPS

Most artificial salt mixes do not remove tap water disinfectants, like chlorine and chloramines. To assure all tap water disinfectants are removed, use STRESS COAT when making partial water changes or when topping off the tank with fresh water.

Major and minor elements found in natural seawater are essential to marine aquariums. Over time, these elements are depleted by natural aquarium processes. To ensure trace element availability, add API MARINE COMPLETE TRACE on a weekly basis.

Keep out of the reach of children.

For aquarium use only.

Treats up to 948 U.S. gallons (3,588 L) of salt water.
