844-EBBE-866

INSTRUCTIONS FOR USE: Apply to the affected area twice daily (or as needed) and massage gently. Store in cool, dry place

AD¹ ATOPIC DERMATITIS GEL

Atopic dermatitis is a skin alteration that consists of dry, flaky and irritated skin.

EBBE atopic dermatitis gel (AD1) hydrates and provides the emollience required to balance and restore the cutaneous barrier function.

The high molecular weight **hyaluronic acid** forms a protective film over the skin's surface layers, thereby reducing the loss of transepidermal water and providing intense and prolonged hydration.

The formula contains ultra-purified **seawater** with more than 75 minerals and trace elements.

EBBE atopic dermatitis gel (AD1) reduces itching and flaking, whilst improving the skin's hydration and elasticity.

The light texture is absorbed quickly.

Specially indicated for sensitive areas such as face, scalp, and groin.

Suitable for use on adults and children.
