Fish Doxy™

(Doxycycline)

Antibacterial Fish Medication

Net Contents: 30 Tablets (100 mg ea.)

**Active Ingredients (in each tablet):**

Doxycycline Hyclate..... 100 mg

**Distributed by:**

Thomas Labs®

Tolleson, AZ 85353

ThomasLabs.com

Fish Doxy™ (Doxycycline Hyclate) is an antibiotic that exerts a bactericidal action on gram-positive and some gram-negative bacteria in fish. Useful for control of some common bacterial diseases in fish, including Septicemia, Mouth Rot, and Fin and Tail Rot.

**Directions:**

Add 1 tablet (100 mg) into aquarium for every 15 gallons of water to be treated. Repeat in 24 hours. It is suggested that a partial water change be made between treatments. While duration of treatment depends on type and severity of infection, it is recommended that extended medication baths continue for a minimum of 5 days but not more than 10 days. Discontinue treatment if no improvement is noted within 5 days. To remove harmless yellow color, change 20% of water and use charcoal filter until clear.

**Warnings:**

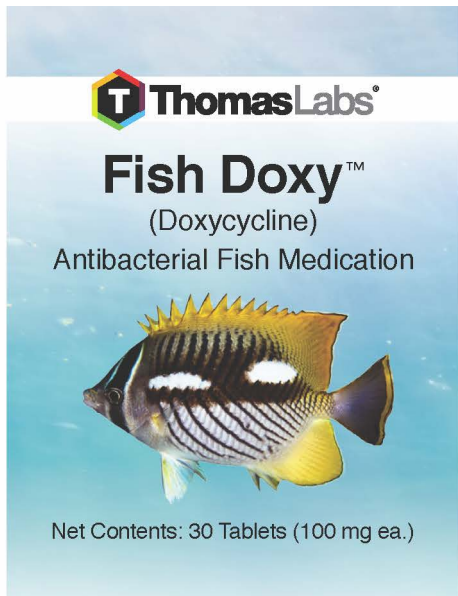

For aquarium and ornamental fish only. Not for human use. This product should not be given to fish intended for human consumption. Keep out of the reach of children and animals. In case of accidental overdose, contact a health professional immediately.

**Storage:**

Keep container tightly closed and in a cool, dry place.
