# FOR INDUSTRIAL USE ONLY KEEP OUT OF REACH OF CHILDREN NOT FOR HUMAN USE

#### Attention

For External Use Only

Wash hands thoroughly after handling.

Get medical advice/attention if you feel unwell.

#### **DIRECTIONS:**

#### IODINE CONCENTRATE MUST BE DILUTED BEFORE USE

#### DO NOT MIX WITH ANYTHING BUT COOL, POTABLE WATER

#### FOR USE ONLY IN A DISPENSING SYSTEM RECOMMENDED BY ECOLAB

**Dilution Parameter:** A dilute solution of a 0.5% iodine teat dip will consist of 87.5% potable water and 12.5% Iodine Concentrate by volume. A dilute solution of a 1% iodine teat dip will consist of 75% potable water and 25% Iodine Concentrates by volume.

**IMPORTANT:** Do not mix Iodine Concentrate or diluted Iodine Concentrate with any other products unless specified in the product use instructions. If transferred from this container to any other, make sure that the other container is thoroughly pre-cleaned and bears the proper container labeling for Iodine Concentrate. If product in dip cup becomes visibly dirty, discard contents and replenish with diluted, ready-to-use product. Do not reuse or return any unused product to the original container.

**Before Milking:** Wash teats thoroughly just prior to next milking with appropriate udder wash solution or pre-milking teat dip to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.

#### **Application of Diluted Iodine Concentrate**

#### **Directions for Teat Dipping**

**Pre-Milk Dipping:** Fill teat dip cup with diluted Iodine Concentrate. Before each cow is milked, dip each teat full-length into the teat dip cup containing diluted Iodine Concentrate. Wipe teats dry after dipping using single-service towels to avoid contamination of milk.

**Post-Milk Dipping:** Immediately after each milking, dip each teat full-length into the teat dip cup containing diluted Iodine Concentrate. Allow to air dry. Do not wipe. Always use fresh, diluted Iodine Concentrate. Do not turn cows out in freezing weather until teat dip is completely dry.

#### **Directions for Teat Spraying**

**Pre-Milk Spraying:** Before each cow is milked, spray entire teat with diluted Iodine Concentrate. Wipe teats after spraying using single-service towels to avoid contamination of milk.

**Post-Milk Spraying:** Immediately after each milking, spray entire teat with diluted Iodine Concentrate. Allow to air dry. Do not wipe. Always use fresh, diluted Iodine Concentrate. Do not turn cows out in freezing weather until diluted Iodine Concentrate is completely dry.

**Expanded Usage:** When freshening cows, begin dipping teats twice daily for about 10 days before

calving.

**PRECAUTION:** Iodine Concentrate is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.

**NOTE:** Use blended Iodine Concentrate within six (6) months of blended date.

#### READ SAFETY DATA SHEET (SDS) BEFORE USING THIS PRODUCT

**EMERGENCY HEALTH INFORMATION:** Contact local poison control.
