Germs are everywhere! They can get onto hands and items we touch during daily activities and make us sick. Cleaning hands at key times with soap and water or hand sanitizer is one of the most important steps you can take to avoid getting sick and spreading germs to those around you.

Do **NOT** use hand sanitizer if your hands are visibly dirty or greasy. Wash your hands with soap and water instead.

Always supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in schools and child care facilities. This sanitizer is not recommended for infants.

- **Apply.** Put enough product on hands to cover all surfaces. Use the included cap or pump for accurate dispensing.
- **Rub** hands together, until hands feel dry. This should take around 20 seconds. Always securely close the bottle when finished.

Note: Do not rinse or wipe off the hand sanitizer before it's dry; it may not work as well against germs.
