Drug Facts

API MAKES POND CARE EASIER

Helping pond owners maintain clean, clear water and healthy, active fish is our goal at API. Visit www.apifishcare.com for pond tips and an easy-to-use calculator to estimate the size of your pond for better, easier pond care.

WHY USE STREE COAT?

Instantly removes chlorine and chloramines

Detoxifies heavy metals from tap water

Reduces fish stress

Protects fish and heals fish wounds

STRESS COAT completely neutralizes and removes chlorine, chloramines and the ammonia associated with the chloramines, to make tap water safe for pond fish.

STRESSCOAT contains the healing power of Aloe Vera, and a slime replenisher to reduce fish stress. High stress levels can cause fish to lose their slime coat and be more susceptible to disease.

STRESS COAT also promotes the healing of damaged skin and fins and wounds. Use whenever tap water is added to the pond, when adding fish or when fish are injured.

DIRECTIONS

Use the dosage cap on the bottle.

When adding water to the pond: add 15 ml (1 Tbsp.) per 60 U.S. gallons (228 L) of pond water, or 1/2 cup (120 ml) for each 480 U.S. gallons (1,820 L).

In areas of known high choramines use by local water companies, double the dose for added fish protection.

When introducing fish to the pond and to promote healing: double the dose.

Keep out of the reach of children.

Safe for fish and pond plants, as well as surrounding wildlife and pests, when used as directed.

For ornamental pond use only.
