## **Directions**

1. Take a supine position, and support the hip with a cushion. Remove the socket at the top of the injector and use it as the plunger rod. Slowly insert the gel injector containing antibacterial gel into the deep area of vagina. Deliver the gel into the vagina by pushing the plunger.
2. If there is discomfort in the intimate area, squeeze a little of the gel and apply onto the area, then gently rub for a while.
3. While in use, it's normal to see vaginal discharge, so it's recommended to use panty liners meanwhile.
4. Better effect can be obtained if FUYANJIE WASH is used before applying this product.

## **Other information**

This product can sterilize staphylococcus aureus, Escherichia coli, and Candida albicans. Keep in sealed container, and place in a cool dry place.
