Dr. Washington Wentworth Sheffield invented toothpaste in 1850 and started producing his "Analgesic Bain" ointment and "Crema Dentifrice" in his laboratory behind his house. This was the beginning of today's Sheffield Pharmaceuticals. Another first occurred in 1876, when he and his son, Dr. Lucius Tracy Sheffield, were the first to package toothpaste, cream and ointments into tubes. Many of today's leading brands were first produced in our laboratory. To this day, Sheffield Pharmaceuticals continues to excel in product development, our long history of product innovation and technical expertise assures you of the consistently high quality and effectiveness that you need and deserve.
