

TRISDENT- chlorhexidine gluconate rinse

DermaZoo, LLC

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, [click here](#).

Dental disease is the most common clinical condition occurring in both adult dogs and cats.

Chronic dental disease can cause more problems than tooth pain and bad breath. It is also associated with damage to our pets' internal organs as they age. The key to management of dental disease is prevention through routine dental care. Excellent oral health can be maintained with a consistent oral hygiene regimen.

INDICATIONS AND USAGE

DIRECTIONS: Shake well before use. Hold bottle in the upright position and elevate the pet's upper lip to expose teeth and gums. Point and squeeze to apply a stream of TrisDent™. To prevent injuries, avoid contact of spout tip with gums. Avoid contact of solution with eyes. Rinse daily after eating or as directed by your veterinarian.

INDICATIONS: TrisDent is an appealing, beef-flavored, patent-pending combination of tromethamine, edetate disodium dihydrate and 0.12% chlorhexidine gluconate. These oral hygiene compounds help control plaque without brushing, as well as assist in reducing the calcification of plaque to calculus. TrisDent combines chlorhexidine, an effective anti-plaque agent, and Tris-Edta, a novel and unique compound which inhibits plaque, blocking its mineralization to calculus while enhancing the anti-plaque activity of chlorhexidine.

DESCRIPTION

ACTIVE INGREDIENT: 0.12% Chlorhexidine Gluconate

INACTIVE INGREDIENTS: Water, Sorbitol, Glycerin, Tromethamine Hydrochloride, Tromethamine, Disodium EDTA, Sodium Benzoate, Beef Flavor

No Animal Protein

WARNINGS AND PRECAUTIONS

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian. Keep out of reach of children. Store at room temperature. For animal use only.
