Always use caution when introducing your cow to a new teat dip.
 Remember these industry guidelines:
 Replaces old teats and/or liners for a new dip. When introducing a new dip to a dairy herd, always replace dip cups and/or brushes to prevent the new dip from mixing with the old dip. If spray or dip pumps are used, lines should be flushed with hot water to clean out any residue of the old dip.
 Aggressively clean teats to remove exfoliated skin and dead teat ends to insure the dip is applied to healthy skin.
 A temporary exfoliation of dead teat skin is common after new dips are introduced. Be sure to aggressively clean teats to remove exfoliated skin and dead teat ends to insure the dip is applied to healthy skin.
 Monitor for changes in skin conditions. New teat dips designed with emollients and other skin conditioning ingredients to maintain healthy teat skin and fight perma. Rare teat skin reactions due to allergic or environmental conditions may occur. Closely monitor teat skin conditions and if irritation occurs, stop use. If irritation persists, contact a physician. If persistent, replace dip with one containing a different permethrin and/or emollient formula.

Siempre tener cuidado al usar un nuevo sellador de pezones en las vacas.
 Tomar en cuenta las siguientes recomendaciones de la industria:
 Usar tazas del sellador limpias y/o limpiar los tubos del rociador del sellador. Cuando se usa un nuevo sellador de pezones en las vacas, se deben siempre reemplazar las tazas y/o limpiar los tubos del rociador del sellador con agua caliente para evitar cualquier residuo del sellador anterior.
 Limpie fuertemente las pezones para retirar la queratina y las escamas. Los pezones que se exfolian temporalmente son comunes después de introducir un nuevo sellador de pezones. Elimine las escamas en la piel. Limpie bien fuertemente las pezones y los extremos del pezón para eliminar las escamas en la piel.
 Controle las vacas y observe los cambios de condición de la piel. Los nuevos selladores de pezones diseñados con emolientes y otros ingredientes acondicionadores de la piel para la mantención saludable de la piel del pezón y para la destrucción de gérmenes patógenos. Ocasionalmente, se podrían producir reacciones alérgicas o ambientales por lo que se debe monitorear de cerca la condición de la piel. Si se presenta irritación, detenga el uso. Si la irritación persiste, consulte con un médico. Si la irritación persiste, presente cualquier condición en su piel. Reemplazar el sellador con otro que contenga una fórmula con diferente permethrin o emoliente.
