

API FURAN-2- nitrofurazone powder
MARS FISHCARE NORTH AMERICA, INC.

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, click here.

Drug Label

Active ingredient: 85 mg Nitrofurazone per packet.

Directions for Use:

For best results, remove filter media and continue aeration

For each 10 gallons of water, empty one packet directly into aquarium.

Repeat dose after 24 hours. Wait another 24 hours then change 25% of the aquarium water.

Repeat this treatment for a second time, for a total of 4 doses.

Then make a final 25% water change and add fresh filter media.

Treatment may be repeated, if necessary.

Note: This medication will cause a slight discoloration of water which can be removed with API BIO-CHEM ZORB or activated carbon.

TIP: Antibiotic medication may inhibit the biological filter. Adding API QUICK START, a nitrifying bacteria, is recommended after treatment to boost the biological filter.

This package treats up to 100 gallons. Four doses required for full course of treatment.

Diagnostic Chart

Hemorrhagic Septicemia:

A bacterial infection of the bloodstream. Fish may show blood streaks on the body and fins, bleeding (red patches) and localized swelling.

Body Slime and Eye Cloud:

Eyes develop a white haze and/or protrude from the head. Slimy patches appear on the body. Fish may scratch on objects and exhibit rapid breathing. Infection may cause abnormal osmotic function resulting in fluid accumulation to the eyes and/or body.

Open Red Sores:

A bacterial infection that causes open red sores on the body. Infection can range from very small ulcers to deep skin lesions. Coloring can range from reddish or gray ulcers to very dark areas associated with necrotic (dying) tissue.

Fin and Tail Rot:

Fins appear ragged and split. In severe cases, fins and tail are almost completely eroded. Secondary fungal infections, observed as white, "cottony" growth, commonly occur.

Bacterial Gill Disease:

Fish may breathe heavily and show bright red gills. Fish may sit at bottom of aquarium or near the water's surface. However, visual diagnosis is often difficult.

KEEP OUT OF THE REACH OF CHILDREN.

For aquarium use only.

Not for human consumption or the treatment of fish intended for human consumption.

Avoid contact with skin and eyes.

May cause irritation.

! WARNING:

This product can expose you to chemicals including Nitrofurazone, which is known to the State of California to cause cancer.

For more information go to www.P65Warnings.ca.gov.

HUMAN WARNING:

Carcinogenesis: Nitrofurazone, an active ingredient in Furan-2, has been shown to produce mammary tumors on rats and ovarian tumors on mice.

Some people may be hypersensitive to this product.

Either wear gloves when dosing wash hands afterwards
