Maximum Strength Anti-Fungal Liquid

WHAT IS FUNGUS INFECTION OF THE FINGER AND TOES?

Common topical fungus infections of the finger and toes are caused by a variety of fungi. Using small breaches in the skin's surface, these organisms can cause infection by contact with infected surfaces, animals, or people. Once infection starts, spreading may occur. For example, infected fingers and toes may infect other fingers and toes. Although such infections often develop slowly, they may be difficult to eliminate if not treated promptly with an effective anti-fungal medicine like this product.

HOW DO YOU KNOW IF YOU HAVE A TOPICAL FUNGUS INFECTION?

Some topical fungal infections may present themselves on the skin surface as ring-like formations with clear centers; this is commonly called ringworm. Athlete's foot fungus, when in the finger and toes areas, is often characterized by scaling of skin, burning, cracking, itching, and related discomforts.

UNDERSTANDING AND TREATING A NAIL AREA INFECTION:

Fungal infections of the nail areas are often caused by the same fungi that lead to athlete's foot and ringworm infections elsewhere on the body. These fungi can infect the entire area around the nails including the cuticles, the nail beds, and even the nails themselves. This product, with its powerful anti-fungal formula, can reach and kill nail bed fungus by direct application or related capillary action. This product cures the infection, allowing the natural regrowth of healthy looking tissue.

TAMPER EVIDENT: DO NOT USE IF IMPRINTED SHRINK BAND IS MISSING OR BROKEN.

NOTE: Fungal infections which are isolated beneath an intact nail or embedded within the nail itself may require consultation from a doctor for proper treatment.

HOW THIS LIQUID WORKS:

This product acts promptly to target, destroy, and prevent the spread of infection by inhibiting the growth and reproduction of fungal cells.

PROMPT ACTION AND PROPER TREATMENT:

Early treatment of fungal infections is important. Once treatment is started with this product; it is important to carefully follow the treatment instructions on the package until satisfactory results are achieved or advised further by a doctor.

NOTE: Noticeable improvement may be expected within 4 weeks in the case of most ringworm and athlete's foot fungus. Consult your doctor for advice if noticeable improvement is not evident by this time or if the condition persists or worsens.

IMPORTANT:

Keep this carton for future reference on full labeling.

if for any reason you are not satisfied with this product, please return it to the store where purchased for a full refund.
